

## QUALITY POLICY

### **Satisfy the needs of our customers**

The needs of our customers are identified, classified according to their profitability in the short, medium and long term and then managed as they are approved.

### **Reduce the rejection of our products by customers**

Understanding as rejected material the defective one due to manufacturing mistakes, failures of components or design errors.  
Information on rejections due to misuse or good operation.

### **Innovate**

### **Improve our products**

Without losing competition in the market.

### **Improve the efficacy of our management system**

Incorporation and innovation of resources such as computer equipment, instruments, tools and software.

### **Objectives are established and reviewed by means of indicators**

We keep objectives that are suitable in our opinion.

### **This Quality Policy is yearly reviewed at the end of the year**

### **Accomplish the current regulations on electrical safety, EMC and RoHS**
